

**Title:** Principal Consultant – Human Factors Specialist (Permanent)

**Location:** Manchester (Denton) and client sites within the UK and overseas

**Package:** Negotiable

## **The Role**

We are looking for a highly motivated, energetic self-starter to join a growing team of consultants and consulting engineers. The successful candidate will be required to participate in and manage a range of projects to improve the design, operation and maintenance of hazardous processing facilities.

This is a client facing role, requiring good interpersonal skills, a head for business and management experience, as well as a desire to remain involved in the technical detail.

## Technical Aspects

Working independently and as part of a team, he/she will be responsible for:

- Management and delivery of agreed internal strategic development projects relating to human factors, to provide a best in class service to clients
- Audits and authoritative reviews, looking for opportunities to improve the interactions between people, equipment and working environments on client sites
- Interfacing with relevant functional groups on client sites to lead or conduct studies to improve the safety, health and efficiency of employees and work systems
- Development of systems and procedures for managing human factors
- Training of client personnel in human factors theory and application of relevant tools and techniques
- Managing professional development of self and direct reports within an existing framework

## Client Management Aspects

In addition to providing technical support, he/she will be required to:

- Support the development and delivery of a continuously improving communications programme
- Help develop relationships with new and existing clients
- Ensure that client needs and expectations continue to be met in relation to quality and delivery

## **Essential Qualifications, Skills and Experience**

The role will require an individual with the following:

- Degree in sciences or engineering
- Membership of the CIEHF
- Good understanding of relevant process safety legislation, including COMAH, and related guidance
- Excellent communications skills (written, oral and listening)
- Aptitude for site-based activity and travel
- Full UK Driving Licence
